TRANSMISSION 722.7 in MODEL WDB168.### ## as of 548031 as of 10.1.01

1 New ignition lock cable
2 Shift lock cable

For cost-saving reasons the shift lock cable of the ignition lock to transmission is discontinued. A cable from the ignition lock to the brake pedal is used in its place. **Consequently, it is only possible to withdraw the ignition key when the brake pedal is depressed**.
The new ignition lock cable (1) does no longer require to be adjusted.
